

Art Museum Partnership

INSTITUTIONAL MEMBERSHIP SUPPORT

The mission of the Art Museum Partnership and its programs is to identify and provide educational opportunities for sharing information, resources, and collections among nonprofit art museums. These initiatives were established by leaders in the art museum community primarily to benefit the small to medium-sized institutions that represent majority of the art museum community. However, larger museums are also encouraged to participate in this vital exchange. Institutional membership support provides an important investment to continue current programs like the Directors Forum and to develop additional initiatives like regional seminars. Future goals include the development of a benefit program that will provide access to reduced rates for fine arts insurance and transportation.
